Sofia Rojas Junior Full-Stack Developer

Ottawa, ON · sofia.rojas@gmail.com · +1 613-555-0142 · linkedin.com/in/sofiarojas

PROFILE SUMMARY

- **Junior Full-Stack Developer** with **2 years** building **practitioner and patient features** at **Fullscript**, after 3 years running day-to-day store operations for Mejuri's online shop.
- Works in languages (**Ruby**, **TypeScript**, SQL), front end (**React**, Apollo Client), back end (**Ruby on Rails**, **GraphQL**), data (**PostgreSQL**, Active Record) and testing (RSpec, Jest, Cypress).
- Comfortable with **small end-to-end changes**: an Active Record migration, the GraphQL mutation behind it and the **React form** that calls it, with request specs and an **accessibility check** before review.
- Works with a **product designer**, a **product manager** and the **practitioner support team** on the treatment plans squad, and pairs every week with **2 senior developers**.
- Wrote the squad's **first-week setup guide** for local Rails and React development, and runs a **monthly accessibility review** of new screens with the design team.

TECHNICAL SKILLS

Languages:	Ruby, TypeScript, JavaScript, SQL, HTML5, CSS3
Front-End Frameworks & UI:	React, Apollo Client, React Hook Form, Liquid (Shopify themes)
Back-End Frameworks & APIs:	Ruby on Rails, GraphQL (graphql-ruby), REST, Sidekiq, Node.js and Express (bootcamp)
Databases & ORMs:	PostgreSQL, Active Record, Redis (basics), schema migrations
Auth, Payments & Integrations:	Devise, role-based permissions, Shopify webhooks, Klaviyo, Stripe (bootcamp project)
Cloud & Hosting:	AWS (S3), Docker, Heroku (bootcamp), Git, GitHub
Testing, CI & Monitoring:	RSpec, Jest, React Testing Library, Cypress, GitHub Actions, Sentry

EDUCATION

Lighthouse Labs — Web Development Bootcamp (12 weeks) — Toronto, ON · Jan 2024 to Apr 2024

York University — B.A. in Communication Studies — Toronto, ON · Sep 2017 to Apr 2021

WORK EXPERIENCE

Fullscript — Junior Fullstack Developer — Ottawa, ON · Sep 2024 to Present

- Shipped **refill reminders** for patient treatment plans end to end, from the Active Record migration to the GraphQL mutation and the React settings page, and **18% of active patients** turned them on within 2 months.
- Built the practitioner's product swap dialog in **React** and **TypeScript** with Apollo Client, focus handling and screen reader labels, closing **27 issues** from the team's last WCAG 2.1 AA audit.
- Added **9 GraphQL mutations** in **Ruby on Rails** with input validation and plain error messages, each covered by RSpec request specs and reviewed by a senior developer before merge.
- Backfilled a new dosage unit column across **1.4M treatment plan rows** with a batched **Sidekiq** job, after a senior review of the migration, without locking the table during clinic hours.
- Wrote **Cypress** tests for the refill and checkout flows and fixed the top Sentry errors on the squad's pages, cutting weekly error events on those screens by **63%**.

Mejuri — E-commerce Coordinator — Toronto, ON · May 2021 to Dec 2023

- Compressed and lazy-loaded product images in the **Shopify** theme's Liquid templates with the web team's sign-off, cutting mobile load time on collection pages from 5.2 s to **3.1 s**.
- Set up back-in-stock emails by connecting Shopify inventory webhooks to **Klaviyo** flows, bringing back about **$40K a quarter** in sales from shoppers who had found a piece sold out.
- Audited Shopify staff accounts with the IT lead, removing **34 stale logins** with full admin rights and moving store staff to role-based permissions with two-factor sign-in.
