Anneliese Brandt Junior SAP ABAP Developer

Mannheim, Germany · anneliese.brandt@gmail.com · +49 621 555 0177 · linkedin.com/in/anneliesebrandt

PROFILE SUMMARY

- **Junior SAP ABAP Developer** with **2 years** on the finance and procurement SAP team at **Roche Diagnostics**, after 4 years as a finance analyst working in SAP ECC every day.
- Works in **ABAP Objects**, ALV, BAdIs and **CDS views**, builds **SAP Fiori elements** apps on OData, and knows the FI and MM tables from the user side first.
- Strongest in **finance reporting**, **ATC cleanup ahead of S/4HANA** and turning month-end spreadsheets into scheduled reports, with ABAP Unit tests on every new class.
- Works with 2 senior developers and the FI functional consultant, and writes specs back in the words finance users actually use, so fewer questions come back.
- Runs the team's monthly **Fiori elements** lunch session and keeps the onboarding notes for new developers on the finance package.

TECHNICAL SKILLS

ABAP & ABAP Cloud:	ABAP, ABAP Objects, ALV, BAdIs, user exits, ABAP Unit
CDS, RAP & HANA:	CDS views, Open SQL, RAP (basics)
SAP Fiori & UI5:	SAP Fiori elements, SAPUI5 (basics), SAP Business Application Studio
Integration & Interfaces:	IDocs, BAPIs, OData
SAP BTP & Extensions:	SAP BTP, CAP (Node.js)
SAP Modules & Processes:	FI, CO, MM, record-to-report
Tools, Transports & Testing:	ABAP Development Tools, SE80, ATC, transport requests, Jira

EDUCATION

SAP — SAP Certified Associate - Back-End Developer - ABAP Cloud — Online · Jun 2024

University of Mannheim — B.Sc. in Business Informatics — Mannheim, Germany · Sep 2017 to Aug 2020

WORK EXPERIENCE

Roche Diagnostics — Junior SAP ABAP Developer — Mannheim, Germany · Oct 2024 to Present

- Built **22** ALV reports and 9 BAdI implementations in **ABAP Objects** for FI and MM, used each month by about 140 finance and procurement users.
- Rewrote the open items report on **CDS views** instead of nested SELECT statements, cutting its runtime from 14 minutes to **40 seconds**.
- Built **4 SAP Fiori elements** apps on OData V4 services for invoice approvers, so managers sign off from their phones instead of an SAP GUI screen.
- Fixed the **ATC** findings in the finance custom code ahead of the S/4HANA conversion, taking priority 1 findings in the FI package from 310 to **0**.
- Built a side-by-side approval app on **SAP BTP** with CAP that reads ECC through an OData service, the team's first extension outside the core, now used by **60** approvers.

Südzucker — Finance Operations Analyst — Mannheim, Germany · Sep 2020 to Sep 2024

- Tested the bank statement **IDoc** interface for 4 legal entities as the finance key user, logging **27** mapping defects for the SAP team before go-live.
- Wrote and tested **18** functional specs for custom finance reports, signing off each transport in the QA system before it moved to production.
- Moved 6 month-end spreadsheets into SAP Query reports, cutting the reconciliation close from 4 days to **1.5**.
